MINING TAG

Contact Kenneth Tengelin

Mail ktengelin@miningtag.cl

Phone 56984255266

Web www.miningtag.cl

Description Mining TAG is a company that creates high-tech systems for the monitoring, automation and improvement of mining processes. We support mining production, bringing visibility to your work and increasing workforce safety. Our solutions are based in wireless sensors that process and deliver your data through the latest generation of software, enabling real-time decision making for your management team. Our robust network of global mining industry professionals and their contractors endorse our world class solutions as superior underground production controls, traffic management and personnel safety.

Chile

SALAS HNOS

Contact Claudia Salas

Mail claudia@salasing.cl

Phone 56226240939

Web www.salasing.cl

Description SALAS is a family business with over 60 years of experience in the local market. Founded in 1947 as a small electro-mechanic workshop dedicated to the manufacturing and repair of agricultural and industrial machinery, our business soon became one of the most important metalworking workshops in Chile, fully dedicated to manufacturing and repair of mining equipment. Over the years, SALAS has increasingly specialized in the mining industry, manufacturing, maintaining and repairing mining machinery and medium-to-large scale mining plants, laboratory equipment for metallurgical analyses and replicating small scale industrial processes. Today, our company not only delivers local services, but also exports its machinery and engineering services to nearly every country within the Americas and abroad.

A large industrial tunnel boring machine (TBM) cutterhead is the central focus, showing a complex array of cutting tools. Workers in orange safety gear are visible on scaffolding to the left, providing a sense of scale. The scene is dimly lit with industrial lights, creating a gritty, high-contrast atmosphere.

HIGHSERVICE CORP

Contact Ana María Miclea

Mail clientes@highservice.cl

Phone 56226635700

Web www.highservice.com

Description

HighService Corp is a holding of 4 businesses headquartered in Chile, with offices in Peru and the USA. An experienced global provider, our company has conducted projects on 6 continents, providing specialized services in critical equipment, robotics solutions, engineering, construction services, plant maintenance, as well as support and technological innovation solutions. With a wide base of national and international clientele alike, as well as over 16 years providing superior services, our company is confident, experienced, and committed to offering results that are unmatched.

A construction worker wearing a grey hard hat, a red safety vest over a dark long-sleeved shirt, and dark pants is working on a steel structure. The worker is positioned between vertical steel beams, and their hands are near a horizontal beam. The background shows a grid of steel beams and a blurred cityscape at night. A red square logo with the word "Chile" and a trail of white stars is overlaid in the top left corner.
