THE ATTRIBUTES OF CHILEAN FOOD

Chile is a country with great natural and human potential located in a place of amazing geographical and climatic contrasts. Chile's unique characteristics lend it unrivalled conditions for producing fresh, pure, healthy, good quality food which is appreciated around the world.

Innocuity

Natural phytosanitary barriers, which isolate Chilean foods, keeping them free from pests and diseases. In Chile, we do not have foot and mouth disease, fruit flies, phylloxera or other diseases.

Quality

The result of our combination of geography, climate, experience and professionalism. Taken together, these characteristics enable Chile to produce food which is world-renowned for its quality.

International Guarantee

Valuation and recognition in global markets. Our attributes and long track record in international trade enable us to provide guarantees for our products, which are valued by consumers on every continent.

Traceability

Complete monitoring of the productive process in accordance with strict quality control standards means we can offer certified products.

Natural Flavour

Purity and freshness from the place of origin. Thanks to our climate - very warm summers and cold winters - and geography - our mineral - rich soils, amongst other factors - our products are a source of life.
